March 2023

SW developer for encryption solutions.
Do you have a passion for SW development and secure communication?

Dencrypt seeks a skilled and ambitious SW developer for our Copenhagen or Aalborg offices. If you want to use your skills to develop solutions for encrypted mobile communication, then become part of an innovative company with solid growth.

We offer:
An opportunity to apply and further develop your competencies within SW design and implementation to develop new functionality and services for our back-end server systems, which support dynamically encrypted mobile communication. You become part of a team of 12 experienced developers who work with the latest technologies and excellent professionalism. You can apply your knowledge and help develop state-of-the-art technology for our encrypted communication products and solutions used worldwide by governments, police, armed forces and private companies.

We have an open and informal working day with delegated responsibility. Still, we help and support each other to achieve a common goal. You get a unique opportunity to influence the development of a small company with strong growth potential.

The job:
You get a central position with the following:
- Design, implementation and testing of functionality for our server systems.
- Maintenance and further development of build environments and test systems.
- Web development for user and server administration.

As part of our teams in Aalborg and Copenhagen, you are involved in the entire development process and contribute to all phases, from idea and concept development over implementation to testing and release. You work in our agile team, where we use Kanban daily.

You shall apply for the job if you ...
- have a passion for SW development and secure communication.
- are quality-aware and only consider a job done when reviews of code, test and documentation are successful.
- thrives with changing work assignments and where you get in touch with many technologies.
- are a team player, but you can also work independently.
- have the courage and desire to learn new things.

Your skills and personality:
The ideal candidate is a skilled SW developer. You may have graduated recently, or you have some years of relevant work experience. You have an academic background, such as a master's degree in SW Design or similar. You are an efficient programmer and have worked with one or more of the following technologies:
- C ++, Python
- Development tools like Make, CMake, Autoconf / Automake, Git, CI
- Linux
- SQL

and may have experience with:
- PHP, JavaScript, CSS, HTML
- Web services/applications, REST API
- SIP-based VoIP communication
- Docker

You are ambitious and put your mark on work and the workplace. You immerse yourself, work in a structured way and have a sense of quality in coding, testing and documentation. You like to work in geographically dispersed teams and communicate at a high level, both in writing and orally, in English.

It is a requirement that you can receive a security clearance from the Danish Defense Intelligence Service.

About Dencrypt

Dencrypt A/S specialises in developing and providing secure communication solutions based on the principle of Dynamic Encryption. Our mission is to enable everyone to communicate in confidence. We combine advanced encryption technology with user-friendly operation.

Dencrypt is a Danish company with offices in Copenhagen and at Novi in Aalborg.
