

Job Posting: Full Stack Software Developer for Military Grade Communication Solution

Company Name: Dencrypt A/S

Location: Aalborg or Hvidovre, Denmark

Company Profile:

Dencrypt is a dynamic SME specializing in cryptography and secure communication. We are dedicated to creating innovative solutions that safeguard the confidentiality and integrity of digital communication. With a focus on advanced cryptographic technologies, we strive to deliver secure and reliable solutions to our clients.

Position: Full Stack Software Developer for Backend Server System

Job Description:

As a key member of our development team, you will be responsible for designing, implementing, and maintaining backend server components for our encrypted mobile communication solutions. You will work closely with our experienced team of cryptographers and software developers to create robust and secure systems.

Responsibilities:

- Full stack development and maintenance of server applications for encrypted mobile communication
- Continuous improvement of system performance and security
- Collaboration with mobile client developers and other team members to ensure integrated functionality
- Troubleshooting and resolving technical challenges

Qualifications:

- A Master's degree in software development or equivalent experience
- Experience with full stack development
- Experience with backend development and server architectures
- Experience with development tools, such as GIT, CI or Docker
- Familiarity with cryptographic principles and technologies such as TLS
- Preferably experience with Python, Linux, SQL
- Ability to work independently as well as in a team
- Interest in security aspects of software development

It is a requirement that you receive a security clearance from the Danish Defense Intelligence Service.

We Offer:

- An exciting opportunity to work with cutting-edge technologies in secure communication.
- A dynamic and innovative working environment
- Opportunities for professional development and advancement
- An open and informal working day with delegated responsibility.
- A unique opportunity to influence the development of a small company with strong growth potential.

How to Apply:

Send your application, CV, and any references to career@dencrypt.dk by 21 January.

We look forward to welcoming a new member to our team who shares our passion for secure communication and cryptographic innovation.
